ULTRA-LIGHT ALUMINUM RACING WHEEL

The Ultra-Light Aluminum Racing Wheel has become a favorite on the grand-prix racing circuit because of its low weight, sleek styling and sensitive feel. Popularized on the Farr 40 fleet, the Ultra-Light Wheel is available in symmetrical and non-symmetrical designs from 44" (1118mm) to 80" (2032mm). Welded aluminum construction give the best in strength and rigidity. The airfoil-shaped spokes contribute to fore and aft rigidity and the oversized circular wheel rim provides a comfortable grip in heavy seas and when wearing gloves. For the ultimate in durability, each Ultra-Light Wheel is coated in Edson's renowned baked on urethane powdercoat, in either white or black, or in custom colors to match your racing boat's color scheme.

Features:

- Welded and doweled construction give the best in strength and rigidity.
- Airfoil shaped spokes for rigidity
- Sleek dual spoke dished design
- Black, White or custom powder coat colors available
- Available from 44" (1118mm) to 80" (2032mm)
- Leather or Comfort Grip Wheel rim covers recommended
- Buck Tan or Dove Gray Leather Rim cover available
- Custom Engraving available on faceplate
